

Copyright Guidelines for Authors

In order to deposit a work in [CrossWorks](#), you must hold the copyright to that work, or have the approval of the copyright holder to do so. However, if the work is also being published by a traditional publisher, you may have transferred your copyright as part of the publication process. You need to know the copyright status of your work before submitting it to *CrossWorks*.

IF YOU RETAIN COPYRIGHT

If you retain copyright to the work in question and have not given someone else exclusive rights to distribute it, you may submit it to *CrossWorks*.

If you share the copyright with other authors, check with them to make sure they also approve of the work being archived and made available in *CrossWorks*.

IF YOU DON'T RETAIN COPYRIGHT

If you do not retain copyright but have transferred your rights to your publisher, you may still be able to deposit a version of your scholarship to *CrossWorks*. You should check your publisher's copyright policy to determine what may be submitted to an institutional repository. We recommend that you use the SHERPA listing of publisher copyright policies <http://www.sherpa.ac.uk/romeo/>.

Some publishers allow such deposit, though often with certain conditions:

- some allow the postprint to be submitted to an institutional repository, but not the publisher's PDF version. (The "postprint" is the final, post-peer-review version of the article as it has been accepted for publication. It is typically submitted to the repository as a file in a word-processing format such as MS-Word. The "publisher's PDF" is an exact page image of the article as it appears in print.)
- some allow deposit but not until the publisher's version has been released (or some specified period after release).
- some publishers require acknowledgement that they hold the copyright, and/or a link to the final version on their website.

Other publishers do not allow any version of the article to be deposited. While the SHERPA listing is growing, it does not cover all publishers. Please contact the [CrossWorks Coordinator](#) if you have questions, or need assistance determining the copyright status of your work.

IF YOU DON'T KNOW WHO PUBLISHES YOUR JOURNAL

Because of mergers and acquisitions, it is sometimes difficult to identify the parent company of a journal. The SHERPA site <http://www.sherpa.ac.uk/romeo/> allows you to input the journal name to search the publisher. You can then click on the publisher's name to check its policies.

DOI – Digital Object Identifier: Many publishers assign a number called a Digital Object Identifier (DOI) to each article they publish. If you desire or are required to include a reference to the publisher's final version of a paper, a DOI provides a stable, permanent identifier. You can turn a DOI into a URL by prefixing <http://dx.doi.org/> to the front of the DOI. Alternatively, you can use CrossRef's free DOI lookup <http://www.crossref.org/guestquery/> service. You have to enter either the journal title or the ISSN (they recommend title), and either the first named author or the first page number. The more information you input, the fewer results you will need to look through.

IF YOU ARE SUBMITTING AN ARTICLE FOR PUBLICATION

Consider retaining rights to your article by attaching the Scholar's Copyright Addendum <http://scholars.sciencecommons.org/> (from SPARC & Science Commons) to your publisher's contract. You may also wish to assign a [Creative Commons](#) license, which provides more detailed permissions and terms of use.
