This Technical specification is brought to you for free and open access by the Library Services at CrossWorks. It has been accepted for inclusion in CTS URN Subnamespace Registry by an authorized administrator of CrossWorks.

Registry of subnamespaces for the CTS URN namespace, version 1.0.0

Summary

This is **version 1.0.0** of the registry of CTS URN subnamespaces, listed alphabetically by subnamespace abbreviation. Release versions of this registry are maintained at <https://crossworks.holycross.edu/cts-subnamespaces/>.

Version numbers follow the principle of semantic versioning. Major numbers are incremented when one or more records are deprecated; minor versions are incremented when new records are added; patch versions are incremented when associated information is modified without change to the mapping of subnamespace abbreviation to full URI.

A machine actionable version of this registry is available through the CITE Services API from <http://cite-architecture.org/cts-sns/>.

Submit requests for additions to this subnamespace through <https://github.com/cite-architecture/cts-sns-registry>.

For information about the CTS URN namespace, see <http://cite-architecture.org/ctsum/>.

Registry

botcar

URI: <http://folio2.furman.edu/ns/botcar>

Status: **current**

Texts related to the early scientific exploration of the Carolinas. Identified by the Botanica Caroliniana Project.

More information: <http://folio.furman.edu/projects/botanicacaroliniana/index.html>

fufolio

URI: <http://folio.furman.edu>

Status: **current**

Miscellaneous modern literary texts for teaching and research at Furman University.

More information: <http://folio.furman.edu/cite.html>

greekLit

URI: <http://chs.harvard.edu/ctsns/greekLit>

Status: **current**

Ancient Greek texts known from manuscript transmission.

More information: <https://github.com/chs-tg/greekLit>
